

GREENMILKCONCEPTS

GMC Google Ads Case Study

Managed and optimized an active Google Shopping campaign for Green Milk Concepts during my SEO internship. Responsibilities included campaign monitoring, bid optimization, KPI tracking, performance analysis, and reporting.

CLIENT : Green Milk Concepts
ROLE : SEO Intern

Google Ads Shopping Campaign Optimization

Project Overview

BUSINESS OVERVIEW

Green Milk Concepts is a wellness brand offering herbal and health-related products through its e-commerce platform. The business focuses on improving online visibility and reaching potential customers through Google Shopping campaigns.

CAMPAIGN OBJECTIVE

The objective of this Google Shopping campaign was to increase product visibility, attract high-intent customers, improve campaign performance, and support business growth through continuous campaign optimization.

BUSINESS CHALLENGES

Before optimization, the campaign required continuous monitoring to maintain performance. Daily bid adjustments, KPI tracking, and performance analysis were necessary to improve efficiency and support campaign objectives.

My Responsibilities

During my SEO internship, I was responsible for managing and optimizing an active Google Shopping campaign. My work focused on campaign creation, performance monitoring, bid optimization, KPI tracking, and performance reporting.

CAMPAIGN CREATION

- Created Google Shopping campaigns for approximately 150 products.
- Configured campaign settings and organized products into Shopping campaigns.

BID OPTIMIZATION

- Optimized bids based on campaign performance.
- Improved campaign efficiency through continuous bid adjustments.

CAMPAIGN MONITORING

- Monitored campaign performance daily.
- Tracked key metrics including Clicks, CTR, CPC, Conversions, and Cost.

PERFORMANCE REPORTING

- Prepared campaign performance reports.
- Documented insights and optimization recommendations.

Campaign Optimization Workflow

The following workflow illustrates the process used to manage and optimize Google Shopping campaigns during my SEO internship.

01

Campaign Creation

- Created Shopping campaigns for approximately 150 products.
- Configured campaign settings and product organization.

02

Campaign Monitoring

- Monitored campaign performance daily.
- Tracked Clicks, CTR, CPC, Avg CPM, Avg Cost, Impression, Conversions, and Cost.

03

Bid Optimization

- Optimized bids based on campaign performance and KPI analysis.
- Adjusted bidding strategies to improve campaign efficiency and maximize results.

04

Performance Reporting

- Prepared campaign performance reports with key insights.
- Documented optimization recommendations for continuous improvement.

Results & Key Learnings

This project provided hands-on experience in managing and optimizing Google Shopping campaigns. Through continuous monitoring, bid optimization, and performance analysis, I strengthened my skills in campaign management, reporting, and data-driven decision making.

01. Key Contributions

- Managed Google Shopping campaigns for approximately 150 products.
- Optimized bids based on campaign performance.
- Monitored KPIs including Clicks, CTR, CPC, Conversions, and Cost.
- Prepared campaign performance reports.

02. Skills & Learnings

- Google Shopping Campaign Management
- Bid Optimization
- KPI Tracking & Performance Analysis
- Campaign Reporting
- Data-driven Decision Making
